Art Unit: 1615

(E) The rejection of claims 3, 4, 8, and 19 under 35 U.S.C. 103(a) as being unpatentable over the combination of US '578, US '508 and US '770 and further in view of US 6,326, 410 ('410).

**The following new rejection is necessitated by applicant's amendment:**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-7, 9, 16, and 19-27 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The claims recite "the therapeutic agent is dispersed from the microchannels----for distribution to the skin". This is new matter not supported by original specification. The specification disclosed loading the microchannels with the therapeutic agent and the therapeutic agent then released to the polymer enrobing material and the porous foam material for release onto the skin surface. The present claims do not recite that the microchannels are loaded with the therapeutic agent, the claims recite only the function of the microchannels, and hence the release of the therapeutic agents. The specification disclosed release of the

therapeutic agent onto the skin surface, and not distribution of the active agent to the skin which encompasses systemic delivery of active agents.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 1-7, 9, 16, and 19-21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Claim 1 recites "the therapeutic agent dispersed from the microchannels", this limitation lacks antecedent basis in the claims because the claim does not recite the microchannels contain therapeutic agent.

### ***Conclusion***

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1615
